Optional Essay: The Bible leaves no doubt as to who created the universe and how it was created. One of the reasons we study the doctrine of creation is so believers will become very familiar with the facts of creation as they are laid out in Genesis 1. Now that you know the facts explain why the Theory of Evolution is not acceptable to you as a believer. 50-100 words. (Use of this essay is up to the individual teacher.)

Suggested Optional Research: Using some good reference books, compare and contrast the meanings of the word asah, yatsar, and kun with the word bara.

Suggested Classroom Discussion (Optional): Discuss some of the answers your class came up with in the essay.

Think About It: Almost every day we hear of new details about our universe. With each new bit of information we find out more about how awesome our God is. Someone said that the odds of the universe arising out of random chance without the expert hand of a Creator to guide them and ending up as we see it now, are about the same as an explosion occurring at a printing factory and the result being a completed copy of the unabridged dictionary!
